

**Thanks for purchasing our Stage 2 Airbox Kit
for Aprilia Tuareg 660
cod. ASPSP2CTUA**

INSTALLATION

A- Remove the seat, remove the tank cap, place a rag in the tank opening to avoid dropping objects in. Undo the 7 torx head screw marked with the red arrows in the pic below, and remove the tank cover:

B- remove the OEM airbox air intake unding the 4 Phillips screws at its corners:

C- reuse OEM screws to fit the stg2 filter frame (take care at do not drop the rear screws):

D- Install appropriate UpMap "AIRBOX" map using the supplied map discount coupon (Upmap T800 sold separately)

ATTENTION: it's a race product to be used in closed circuits only
